

Problem Statement

Users living in areas with lower-than-average bandwidth experience issues accessing larger files via the Internet, therefor making it difficult for them to access the news.

Who is experiencing the problem?

All people that are in low-bandwidth area.

What is the Problem?

People are not able to access news.

Where does the problem present itself?

Areas of the world that don't have very good WIFI reception.

Why does it matter?

People need an easy way to be able to access news, as staying informed on current events is necessary for modern life.
